

POLYTECH Health & Aesthetics Bustiers

Postoperative Compression Therapy

POLYTECH

Health & Aesthetics

POLYTECH Health & Aesthetics Bustiers for postoperative compression therapy improve the aesthetic result of breast surgery.

POLYTECH Health & Aesthetics Bustiers

Postoperative Compression Therapy

Product Description

POLYTECH Health & Aesthetics Bustiers are available in 7 sizes with or without cups and in the colour black or white. They provide an optimal postoperative care after mammary augmentation, reconstruction or reduction.

The bustiers are made of mixed fibres with a high cotton content for greater patient comfort. They can be washed by hand at 30°C. Adjustable velcros, front opening with zip and three hooks and eyes guarantee an easy handling.

Advantages

- Minimizes the occurrence of hematoma
- Reduces postoperative oedema
- Reduces the occurrence of hypertrophic scars
- Holds implants and bandages in their position
- Facilitates wound inspection and handling

Important Information

POLYTECH Health & Aesthetics Bustiers are provided individually packed and non-sterile.

Attention: Please note the detailed instructions for use included with each product.
